

Michael Mills | MD, FRCSC

Dr. Michael Mills specializes in diseases of the retina and vitreous. His practice is focused on retinal diseases such as diabetic retinopathy, macular degeneration, retinovascular occlusive disease, retinal tears and lattice degeneration, macular edema, epiretinal membrane and retinal degenerations. He provides in-office treatments including retinal laser treatments and intravitreal injections.

Dr. Mills has completed two fellowships in surgical and medical diseases of the retina and vitreous. He has studied at the Barnes Retina Institute, St. Louis and the University of Toronto. He holds a fellowship in diabetic retinopathy research from the University of Toronto where he also completed his ophthalmology residency. He obtained his Doctor of Medicine degree at the University of Western Ontario.
